

**PHOTOPROTECTIVE SUNSCREEN COMPOSITIONS COMPRISING  
1,3,5-TRIAZINE COMPOUNDS AND TRIESTERS OF  
BENZENETRICARBOXYLIC ACIDS**

5

**ABSTRACT OF THE DISCLOSURE**

Photoprotective cosmetic/dermatological compositions well suited for UV-  
photoprotecting the skin, lips, hair, eyelashes, eyebrows and/or nails against the  
damaging effects of UV radiation comprise (i) an effective UV-screening amount  
10 of at least one 1,3,5-triazine sunscreen, and (ii) an amount effective to solubilize  
the totality of said at least one triazine sunscreen (i) of at least one triester of a  
benzenetricarboxylic acid, formulated into (iii) a topically applicable,  
cosmetically/dermatologically acceptable carrier therefor.
